

How to manage Content in HP Applications Center

Content

You will find the settings clicking on your account name and on the top right corner of the interface

The screenshot shows the HP Applications Center interface. The top navigation bar includes 'Dashboard', 'Orders', 'Customers', 'Templates', 'Content' (highlighted with a dashed blue circle), and 'Applications'. The 'Content' menu is also highlighted with a dashed blue circle. The dashboard content includes a 'Dashboard' section with a description, a 'YouUnique' profile card, an 'Orders Summary' table, and 'WallArt suite apps' for Wallcoverings, Canvas, and Posters.

Order #	Product	Date	Amount
Order: #213870	Wallpaper	02/13/17 11:14	\$ 44.61
Order: #211917	X-banner	02/ 2/17 07:43	\$ 25.84
Order: #211544	Roller	01/31/17 16:33	\$ 32.30

Overview

Content is organized in folders. Each folder can have different elements:

- Backgrounds: images that will be stretched to cover all the surface of the printed application
- Patterns: vectorial elements that won't distort, no matter the size
- Foregrounds: pictures that will be added over the background
- Fonts
- Customized colors

Here, you will also be able to manage content providers.

The screenshot shows the 'Content' management page. The 'Content' menu is highlighted with a dashed blue circle. It features a search bar for folders, a list of content categories (All content, Backgrounds (109), Patterns (3), Foregrounds (41), Fonts (10), Colors (2)), and an 'Upload content' button. Below is a 'My Folders' section with a '+ Create Folder' button and a grid of folders: HP Samples, YouUnique, Nature, Wall Decals, Cities, Animals, Logos, Flowers, US Demos, and WB Pictures. A note at the bottom indicates 'Showing 10 of 11 folders Show all'.

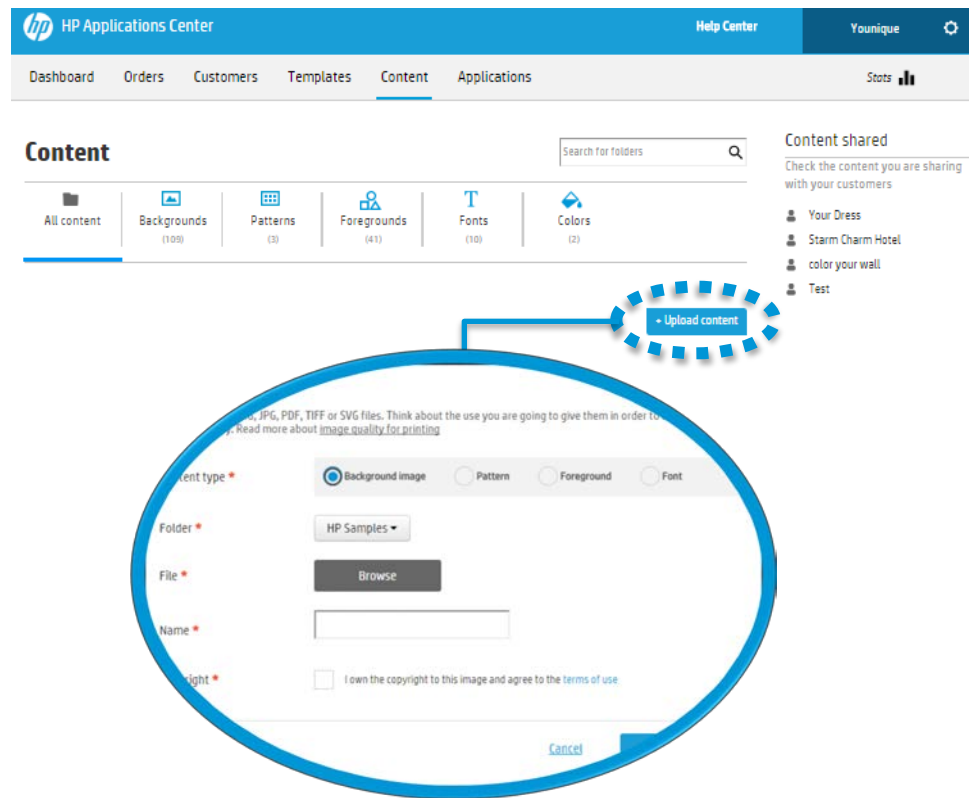

The screenshot shows the 'Content providers' section. A dashed blue circle highlights the 'Content providers' header. A yellow banner states: 'Connecting with content providers allows your customers to access to external content.' Below are four active content providers: Dropbox, Fotolia, Pattern Design, and Instagram.

Uploading and organizing content

Using the “Upload Content” button, you will be able to select:

- Content type to upload (background, pattern, foreground, font)
- Location of the content (which folder)
- Name to be displayed for that element

Note that you will be able to upload more than one element at once using the massive file upload from Dropbox.

Folders and managing content visibility

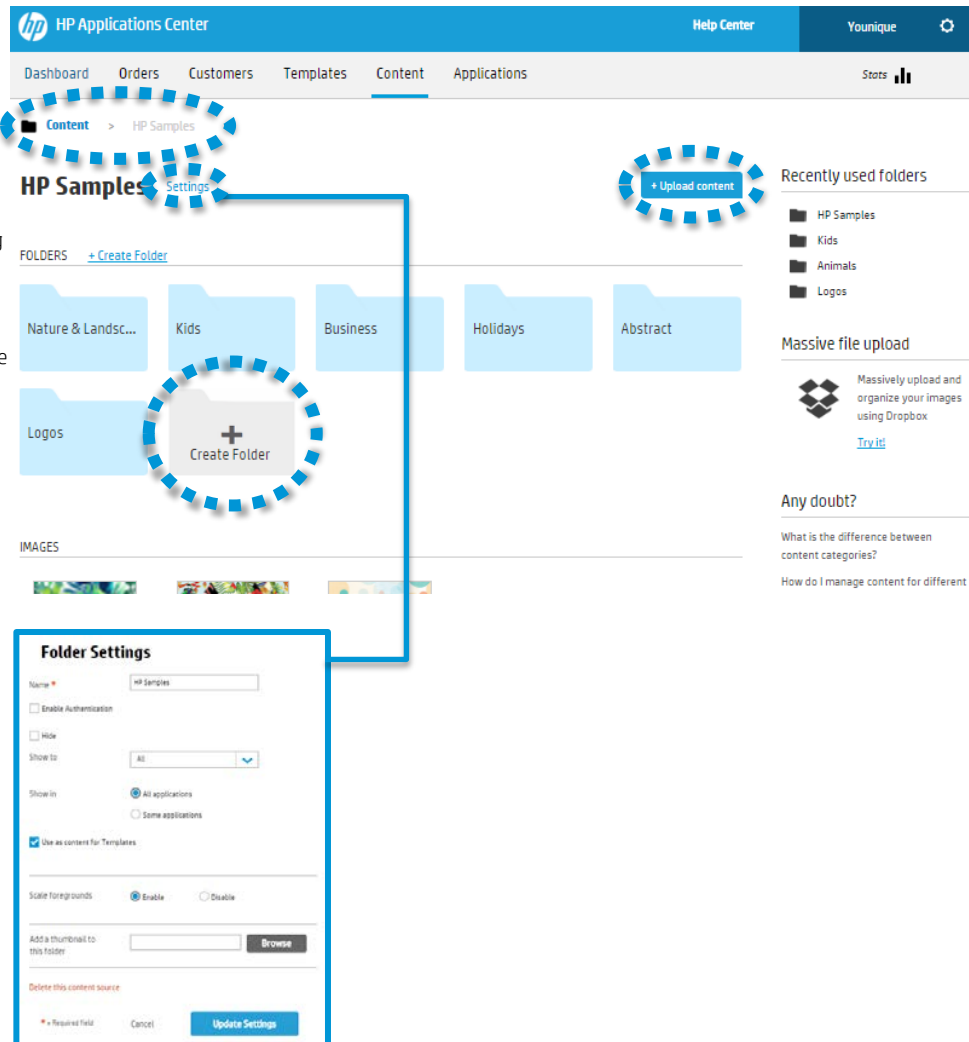

Folders allow you to both organize your content and control who will be able to see what elements.

In order to create a folder, you can use both the “Create Folder” option or clicking on the grey folder.

To access an specific folder settings, you need to be in that folder (you can navigate through folders clicking on them and using the breadcrumbs on the top

In the Folder settings you will be able to define from where to display the folder (specific apps) to who should be able to see and use that folder (specific customers, all, etc.).

Note that when you delete folders, any content inside it will also be deleted.

IMAGES

Managing content

Hovering over each individual element of content will allow you to access options regarding it, from moving it to downloading it (only the person who uploaded the content may download it).
